KTZ237 5 HP submersible dewatering pump designed for industrial drainage, construction dewatering, mining operations, and wastewater handling. Equipped with high chrome alloy impeller for superior durability and heavy-duty performance.

- ✓ Heavy-duty industrial submersible dewatering pump
- ✓ High chrome alloy impeller for superior wear resistance
- ✓ 5 HP motor for powerful drainage performance
- ✓ Suitable for abrasive water and slurry handling
- ✓ Designed for mining and construction applications
- ✓ Efficient high-head water transfer system
- ✓ Durable construction for continuous-duty operation
- ✓ Reliable performance in harsh industrial environments
- ✓ Low maintenance and long operational life

## Technical Specifications

Manufacturer	PROPUMP
SKU	SM-KTZ237-5HP-DWP
Model Number	KTZ237
Power	3.7 kW
Power	5 HP

<b>Voltage</b>	440 Volt
<b>Phase</b>	3 Phase
<b>Frequency</b>	50 / 60 Hz
<b>Current</b>	6.9 Ampere
<b>Maximum Head</b>	33 Meter
<b>Capacity</b>	0.83 m <sup>3</sup> /min
<b>Impeller Material</b>	High Chrome Alloy
<b>Pump Type</b>	Submersible Dewatering Pump

## Product Description

The KTZ237 submersible dewatering pump is a heavy-duty industrial pump engineered for high-performance drainage, dewatering, and wastewater handling applications. Powered by a 5 HP motor, this pump delivers efficient water transfer and reliable operation in demanding industrial environments.

Equipped with a high chrome alloy impeller, the pump offers excellent wear resistance and durability, making it ideal for abrasive water, slurry, and construction site drainage applications. Its robust design ensures long operational life and dependable performance in continuous-duty operations.

Widely used in mining projects, tunneling operations, construction sites, industrial plants, and infrastructure projects, the KTZ237 is suitable for contractors, industrial users, and heavy-duty dewatering systems.

## Compatibility

Compatible with industrial drainage and dewatering systems

Suitable for mining and tunneling operations

Works with construction site water removal applications

Compatible with wastewater and slurry handling systems

Suitable for infrastructure and heavy industrial projects

Works in factories, industrial plants, and process industries

Compatible with contractor and project-based operations

Suitable for flood control and emergency drainage systems

Can be used in municipal and industrial water management applications
