The BOSSCO DSPK-100G is a serious-duty submersible sewage pump — 10 HP, 2500 LPM flow, 28-metre head, built in Taiwan for continuous industrial and municipal sewage handling. This is a professionally refurbished unit, fully tested and ready to install. If you need a high-flow sewage pump that actually works hard without costing a fortune, this is it.

- ✓ BOSSCO DSPK-100G submersible sewage pump — Taiwan-built, engineered for continuous heavy-duty sewage and wastewater handling
- ✓ 10 HP (7.5 kW) motor — delivers 2,500 LPM flow at 28-metre head, one of the strongest output-to-size ratios in this HP class
- ✓ Rated 400V, 3-phase, 50 Hz, 17A full load — plug-compatible with standard industrial power supply in most global markets
- ✓ Handles raw sewage, wastewater, solids-laden effluent, and high-volume drainage — built for applications where flow rate and reliability matter
- ✓ Professionally refurbished and operationally tested — not just cleaned and listed, actually run-tested before dispatch
- ✓ Significantly lower cost than new equivalent — same Taiwan-built performance, fraction of the price
- ✓ Export ready with full documentation — supplied to industrial buyers worldwide with international shipping support

Technical Specifications

Manufacturer	BOSSCO
SKU	SM-BSCSSP-001
Brand	BOSSCO
Model Number	DSPK-100G
Country of Manufactur	Taiwan
Condition	Refurbished
Pump Type	Submersible Sewage Pump
Voltage	400 V
Phase	3
Frequency	50 Hz
Power	7.5 KW
Power	10 HP
Full Load Current	17 A
Max Flow Rate	2500 LPM
Max Head	28 M
Dispatch Time	2 to 5 Business Days

Product Description

The BOSSCO DSPK-100G is not your average sewage pump. Built in Taiwan to handle the kind of continuous, demanding sewage and wastewater duties that cheap pumps simply cannot sustain, this unit delivers 2,500 litres per minute of flow against a 28-metre head — powered by a robust 10 HP (7.5 kW) motor running on 400V, 3-phase, 50 Hz at 17 amps full load. Taiwan-manufactured industrial pumps have earned a strong global reputation for engineering precision, durable construction, and reliable long-term performance — and BOSSCO is one of the names that serious buyers in this category trust. This is a professionally refurbished unit — stripped, inspected, cleaned, and operationally tested before it leaves our facility.

When you need a pump that moves serious volume through sewage, wastewater, and solids-laden effluent without stopping, the DSPK-100G delivers. It is the right pump for municipal sewage lift stations, industrial wastewater treatment plants, large commercial building drainage systems, construction site sump dewatering, food processing and slaughterhouse effluent, and any high-flow application where reliability is non-negotiable. At 2,500 LPM and 28 metres of head, this pump handles flows that smaller units cannot touch — making it a go-to choice for contractors, plant engineers, and facility managers who need real capacity without overpaying for a brand-new unit.

Standard Machinery specialises in professionally refurbished industrial machinery sourced from heavy-duty applications worldwide. Every

pump that leaves our facility has been physically inspected, mechanically checked, and run-tested — we do not sell untested stock. Our refurbishing process focuses on restoring industrial equipment to dependable working condition, so buyers get genuine performance at a fraction of the cost of new. We supply contractors, industrial plant owners, pump dealers, facility managers, and export buyers across multiple continents — and we back every product with honest specs, real photos, and direct communication.

Ready to order? Visit standardmachinery.store or call +91 88666 69293 / +91 98983 98786. We dispatch within 2 to 5 business days. Export orders are handled with full documentation and international shipping coordination — we supply buyers across the Middle East, Africa, Southeast Asia, and beyond. Need a different flow rate, head, or HP rating? Contact us — our refurbished pump stock is always moving and we may have exactly what you need.

Compatibility

Compatible with municipal sewage lift stations, industrial wastewater treatment, commercial building drainage, construction site dewatering, food processing effluent, and high-flow sump applications

Designed for raw sewage, wastewater, and solids-laden fluid pumping — not intended for clean water or chemical fluid applications

Compatible with 400V, 3-phase, 50 Hz electrical supply — standard in most industrial markets globally including Europe, Middle East, Africa, and Asia

BOSSCO DSPK series spare parts and service kits available through BOSSCO Taiwan authorised channels — supports long-term maintainability for buyers worldwide
