The Flygt DXGM 25-11/A is a genuine Italian-made single-phase submersible drainage and dewatering pump — 1.5 HP, IPX8, Class F insulated, S1 continuous duty, with a 14.3-metre max head. This is Flygt engineering at the lighter end of the range — compact, reliable, and built to the same quality standards as the full Xylem industrial lineup. Professionally refurbished, tested, and ready to work. Available at a fraction of the new price.

- ✓ Genuine Xylem Flygt DXGM 25-11/A submersible drainage pump — Italian-made, part number 107678800, built to full Flygt engineering and quality standards
- ✓ Single-phase 220-240V, 50 Hz, 5.54A with 40 µF capacitor — connects to any standard power outlet, no 3-phase supply or specialist installation required
- ✓ Rated 1.5 HP (1.1 kW) with 14.3-metre maximum head — serious drainage performance in a compact, easy-to-deploy single-phase package
- ✓ IPX8 rated — certified fully submersible for continuous underwater operation in drainage, sump, and dewatering applications
- ✓ S1 continuous duty with Class F insulation — runs at full load all day in elevated temperature environments without thermal shutdown or rest cycles
- ✓ Professionally refurbished and run-tested — disassembled, inspected, cleaned, and operationally verified before every dispatch
- ✓ Global Xylem Flygt OEM spare parts availability — capacitors, seals, impellers, and service kits through Xylem's worldwide dealer network

## Technical Specifications

<b>Manufacturer</b>	Flygt
<b>SKU</b>	SM-FLTDXGM-001
<b>Brand</b>	Flygt (Xylem)
<b>Model Number</b>	DXGM 25-11/A
<b>Country of Manufacture</b>	Italy
<b>Condition</b>	Refurbished
<b>Pump Type</b>	Submersible Drainage/Dewatering
<b>IP Rating</b>	IPX8
<b>Insulation Class</b>	Class F (155°C)
<b>Duty Type</b>	S1 Continuous
<b>Power (kW)</b>	1.1 KW
<b>Power</b>	1.5 HP
<b>Full Load Current</b>	5.5 A
<b>Frequency</b>	50 Hz
<b>Voltage</b>	220 - 240 V
<b>Phase</b>	Single Phase (1Ø)
<b>Capacitor</b>	40 µF
<b>Max Head</b>	14.3 m
<b>Application</b>	Drainage / Dewatering
<b>Dispatch Time</b>	2 to 5 Business Days

## Product Description

---

The Flygt DXGM 25-11/A is a precision-engineered Italian-made submersible drainage and dewatering pump, manufactured under the globally respected Xylem Flygt brand. Rated at 1.5 HP (1.1 kW), this single-phase unit runs on 220-240V, 50 Hz, draws 5.54 amps, operates at 110 RPM, and uses a 40 µF run capacitor — making it straightforward to connect to any standard single-phase supply without specialist electrical infrastructure. The IPX8 rating confirms full submersibility for continuous underwater operation, while Class F insulation keeps the motor reliable in elevated ambient temperatures up to 155°C winding threshold. With a maximum head of 14.3 metres, this pump moves water efficiently across a wide range of drainage and dewatering scenarios. S1 continuous duty means it runs at full load indefinitely — no thermal rest cycles, no babysitting. Part number 107678800. This is a professionally refurbished unit — disassembled, inspected, cleaned, and run-tested before listing.

What makes the Flygt DXGM 25-11/A particularly valuable is its single-phase supply requirement — it goes anywhere a standard power outlet exists. Construction site groundwater control, basement and cellar flooding, residential and commercial sump drainage, swimming pool and tank emptying, agricultural field drainage, light industrial sump duty, boat bilge and dock dewatering, and irrigation from open water sources

— this pump handles all of it without needing a 3-phase supply or specialist installation. The 14.3-metre head gives it enough push to lift water from deep sumps or long horizontal runs that smaller domestic pumps cannot manage. Export buyers particularly value single-phase Flygt units for remote-site and off-grid applications where 3-phase supply is unavailable.

Flygt is a Swedish-origin brand now operating globally under Xylem — one of the world's largest dedicated water technology companies. Italian manufacturing under Xylem means this pump carries the same engineering standards and quality controls as the full Flygt industrial range, just in a compact single-phase format. OEM spare parts — capacitors, seals, impellers, and service kits — are available through Xylem's international dealer network worldwide, giving buyers genuine long-term serviceability that generic pump brands simply cannot offer. Standard Machinery sources professionally refurbished industrial equipment from real heavy-duty applications — every pump is physically inspected and operationally tested before dispatch. No untested stock. No surprises.

To order this Flygt DXGM 25-11/A Submersible Drainage Pump, visit [standardmachinery.store](https://standardmachinery.store) or call +91 88666 69293 / +91 98983 98786. Dispatch within 2 to 5 business days. Export orders fully supported — we handle documentation and international shipping for buyers across the Middle East, Africa, Southeast Asia, Europe, and beyond. Need the same model in 3-phase, higher HP, or a different Flygt series? Contact us — our refurbished pump inventory is constantly updated and we likely have what your project needs.

## Compatibility

---

Compatible with construction site groundwater control, basement and sump drainage, agricultural field drainage, swimming pool and tank emptying, boat bilge dewatering, dock drainage, and light industrial sump duty

Designed for clean to lightly contaminated water drainage — not intended for raw sewage, heavy sludge, or high-solid-content fluids; use Flygt 3171 series for those applications

Compatible with 220–240V, single-phase, 50 Hz supply — standard domestic and light industrial voltage across most global markets; requires 40 µF run capacitor included with unit

Flygt DXGM series OEM parts — capacitors, mechanical seals, impellers, and cable entries — available through Xylem's global service and dealer network for full long-term maintainability
