A heavy-duty refurbished SAM BU winch gear motor with integrated brake — rated 3 HP (2.2 kW) at 18 RPM drum output, designed for marine winch and industrial lifting applications. Manufactured in Korea and sourced directly from decommissioned vessels at Alang Ship Breaking Yard, Asia's largest ship breaking yard. Standard Machinery offers this genuine ex-ship Korean winch motor at a highly competitive price with fast dispatch across India and export availability worldwide.

- ✓ Genuine SAM BU winch gear motor with integrated brake — Korean-made, marine-grade, built for continuous duty winch and lifting applications
- ✓ Rated 3 HP (2.2 kW) at 18 RPM drum output — high torque, low speed design ideal for controlled winch, mooring, and hoist drive operation
- ✓ Integrated brake motor — provides immediate load holding on power cut, essential safety feature for marine deck and industrial lifting use
- ✓ Dual frequency compatible — 50 Hz and 60 Hz — directly deployable in India and most international export markets without frequency conversion
- ✓ Voltage range 380V to 440V, 3-phase — compatible with standard industrial and marine electrical supply across India and export regions
- ✓ Refurbished ex-ship condition sourced from Alang Ship Breaking Yard — inspected and tested before dispatch, priced 40-60% below new equivalent
- ✓ Export available to Middle East, Africa, and Southeast Asia — SAM BU is a globally recognised marine equipment brand with international service support

Technical Specifications

| | |
|------------------------|-----------------------------|
| Manufacturer | SAM BU |
| SKU | SM-WNCHGM-001 |
| Brand | SAM BU |
| Country of Manufacture | Korea |
| Condition | Refurbished |
| Product Type | Winch Gear Motor with Brake |
| Voltage | 380 ~ 440 V |
| Phase | 3-Phase |

| | |
|--------------------------|----------------------------------|
| Power | 2.2 KW |
| Power | 3 HP |
| Drum Output Speed | 18 RPM |
| Motor Type | Gear Motor with Integrated Brake |
| Brake Type | Electromagnetic Brake (built-in) |
| Dispatch Time | 2 to 5 Business Days |
| Export Available | YES |

Product Description

The SAM BU Winch Gear Motor with Brake is a purpose-built Korean marine winch drive unit, rated at 3 HP (2.2 kW) with a drum output speed of 18 RPM — delivering high torque at low speed, exactly as required for safe and controlled winch operation. The integrated brake motor ensures immediate load holding when power is cut, a critical safety feature in marine deck winch, anchor winch, mooring winch, and industrial lifting applications. Compatible with 380V to 440V, 3-phase supply at both 50 Hz and 60 Hz — making it one of the most versatile winch drive motors available for both Indian and international markets. This ex-ship unit has been carefully recovered from a decommissioned vessel at Alang Ship Breaking Yard, inspected, cleaned, and tested before listing.

SAM BU winch gear motors are trusted across the global marine industry for deck equipment, mooring systems, anchor handling, and cargo winch drives aboard commercial vessels, offshore platforms, and port equipment. On land, this motor type is equally effective for industrial crane drives, material hoists, cable pulling machines, and any application requiring precise low-speed, high-torque motorised movement with fail-safe braking. The 50/60 Hz dual-frequency compatibility makes this unit directly deployable in India (50 Hz) as well as export markets in the Middle East, Africa, and Southeast Asia — without requiring a frequency converter.

Standard Machinery is a refurbished industrial machinery supplier based in Bhavnagar, Gujarat, India — located minutes from Alang Ship Breaking Yard, Asia's largest ship breaking yard. Alang processes over 50% of Asia's ship recycling, and decommissioned vessels — particularly Korean, Japanese, and European-built ships — regularly carry premium marine-grade equipment including SAM BU winch motors, gear drives, and brake motors. Sourcing directly from Alang allows Standard Machinery to supply genuine Korean-made winch gear motors at 40-60% below the cost of new equivalent units. Every motor is physically inspected and run-tested before dispatch, ensuring buyers receive a reliable, installation-ready product.

To purchase this SAM BU Winch Gear Motor with Brake, visit standardmachinery.store or contact us at +91 88666 69293 / +91 98983 98786. Standard Machinery dispatches within 2 to 5 business days across India. Export orders are accepted from buyers in the Middle East, Africa, Southeast Asia, and other regions — we assist with export documentation and international shipping. If you require a specific RPM output, higher HP rating, or alternative winch motor brand, contact us directly as our ex-ship stock varies and we may have matching units available.

Compatibility

Compatible with marine applications including deck winches, anchor winches, mooring winches, cargo winches, and offshore platform equipment

Suitable for industrial applications including crane drives, material hoists, cable pulling machines, and low-speed high-torque conveyor or lifting systems

Compatible with 380V to 440V, 3-phase, 50 Hz and 60 Hz electrical systems — suitable for India, Middle East, Africa, Southeast Asia, and other

export markets

SAM BU gear motors are compatible with standard IEC flange and foot mounting configurations — verify shaft dimensions and mounting before installation
